Projects

FlexFlow – Fitness & Gym Management Platform

[Live link](#) | [Client Code](#) | [Server Code](#)

Developed a full-stack fitness and gym management platform that enables members to book training sessions, trainers to manage classes, and administrators to oversee platform operations through secure role-based dashboards.

Technologies: HTML, Tailwind CSS, JavaScript, Next.js, Node.js, Express.js, MongoDB, JWT

Key Features:

- JWT-based access control with secure, dedicated dashboards for Admins, Trainers, and Users.
- Real-time class booking system integrated with Stripe for seamless, secure payments.
- Interactive forum for member engagement, plus robust admin tools for full platform management.

Docappoint - Doctor Appointment System

[Live link](#) | [Client Code](#) | [Server Code](#)

Developed a full-stack doctor appointment booking platform that enables patients to browse doctors, view profiles, and schedule appointments through a secure authentication system.

Technologies: HTML, Tailwind CSS, JavaScript, Next.js, Node.js, Express.js, MongoDB, JWT

Key Features:

- Secure Authentication System with user login and logout functionality.
- Doctor Details Page displaying specialization, experience, hospital, rating, and consultation fee.
- Appointment booking system with date and time selection functionality.
